## CEILING LIGHTBOXES

Ceiling lightboxes represent the future of lighting design. They are a highly-effective way of creating a contemporary, premium aesthetic whilst upholding environmental responsibilities and satisfying functional requirements.
Our ceiling lightboxes are readily customisable and deliver homogenous, low-glare illumination using sustainable technologies. We have the manufacturing capabilities, production capacity and industry experience to enable our team to engineer lighting solutions that perform according to the individual needs of our clients – aesthetic, functional, commercial and logistical.
Together, our teams have worked alongside leading architectural practices to deliver ceiling lightbox solutions that are used to great effect inside the UK's most iconic buildings.
